REHAU

Unlimited Polymer Solutions

RAUTHERMEX & RAUVITHERM AUTHORISED INSTALLER

Our operatives are certified installers of both Rehau's Pre-Insulated Pipe Systems – RAUTHERMEX & RAUVITHERM

Suitable for Hot Water, Chilled Water & LTHW underground distribution Temperature and pressure ratings of 6 bar at 95°C

The flexible pipe system enables cost effective routing.

The pipe and fittings are available from 25mm-160mm Cut to length & **stocked in the UK.**

Single pipe is stocked in sizes from 25mm to 160mm and double from 25mm to 63mm and comes in coils up to 560m

The only WRAS approved system in the UK, a necessity for Hot Water systems.

Optimum heat insulation remains water-tight even if the outer jacket is damaged.

With the guaranteed leak free EVERLOC jointing system, there is no requirement for inspection chambers on underground joints.

There is no linear expansion as pipe layers are fully bonded together and therefore no expansion bellows or compensators are required.
